Valentina RUSSO

SUMMARY

Valentina Russo is Full Professor of Veterinary Anatomy at the University of Teramo. Actually she is appointed as Coordinator of the PhD Course in "Cellular and Molecular Biotechnologies".

Her research is focused on improved understanding of stem cell biology, mechanisms of action in regenerative medicine applications, and the interface of biology with materials science.

She has published 90 manuscripts on recognized IF journals and she is Editorial member of several scientific journals.

She is Principal investigator of funded national (PRIN) and European (H2020-MSCA) research projects as the H2020-MSCA-ITN-EJD-2020-P4 FIT project (Grant agreement ID: 955685) on tendon regenerative medicine.
